Relation-informed progressive recommender

Only contextual factors supported by both group-deletion retraining and test-set permutation enter each layer.

1 **Recommend evaluation dimensions**

Rank dimensions
→ user confirms one dimension

Robust contextual inputs

G4 Evaluation object · 96.3%
G1 Evaluation purpose · 2.7%

2 **Recommend subjective indicators**

Use confirmed dimension
→ rank indicators → user confirms one

Robust contextual inputs

G4 Evaluation object · 55.7%
G2 Design domain · 17.2%
G6 Target users · 10.3%

3 **Recommend tools**

Use confirmed dimension + indicator
→ rank tool classes and evidence

Robust contextual inputs

G1 Evaluation purpose · 38.7%
G7 AI function · 19.8%
G4 Evaluation object · 14.6%
G3 Design stage · 10.1%

Across all layers expose supporting papers and evidence records · display uncertainty · permit user revision
